Definitions

The terms defined in this section relate specifically to this policy. For commonly used terms e.g. Approved Provider, Nominated Supervisor, Regulatory Authority etc. refer to the *General Definitions* section of this manual.

Active play: Play that involves large muscle-based activities that are essential for a child’s social, emotional, cognitive and physical growth and development incorporating:

- child-initiated active play, which is developed by the child through exploration of the outdoor environment, equipment and games
- adult-guided active play which encourages children’s physical development through promoting movement skills in a non-competitive environment
- physical activity, which includes sport, incidental exercise and many forms of recreation.

Adequate supervision: (In relation to this policy) supervision entails all children (individuals and groups) in all areas of the service, being in sight and/or hearing of an educator at all times including during toileting, sleep, rest and transition routines. Services are required to comply with the legislative requirements for educator-to-child ratios at all times. Supervision contributes to protecting children from hazards that may emerge in play, including hazards created by the equipment used.

Adequate supervision refers to constant, active and diligent supervision of every child at the service. Adequate supervision requires that educators are always in a position to observe each child, respond to individual needs, and immediately intervene if necessary. Variables affecting supervision levels include:

- number, age and abilities of children
- number and positioning of educators
- current activity of each child
- areas in which the children are engaged in an activity (visibility and accessibility)
- developmental profile of each child and of the group of children
